

PLANNED PROGRAMS FOR POISONING AND PROFIT

A planned program to poison our environment, our water supply and our food has been in progress for well over 100 years and has progressed steadily through the 20th century into the 21st. The Shadow of Power that steers its corporate government, has made sure to cover the most vital areas of nutrition, environment and mind-control in its quest to sicken society. We cover some of these areas here.

* **Mind Control and Illusions.** People today are mind controlled by the medical-pharmaceutical industry and the media on what constitutes health and what will restore health. People have been sold on (and sold out) to) drugs and vaccinations as the answer to their health problems.

Relative to the above is the fact there are strong relationships between intelligence agencies, drug companies, and mind control in America. There are an increasing number of cases where drugs are prescribed for cases of depression, bi-polarism, hyper-active school children and more. Mental health drugs can be seen as a tool by corporate-government to control and manipulate the population. What now is being prescribed in this manner to an increasing number of Americans, is an outgrowth of mental health and behavioral control experiments in the name of "national security" that began since World War II.

Many of these experiments were done through the CIA. The man in Sidney Gottlieb. Gottlieb, who passed away on March 10, 1994, received the highest praise and the distinguished Intelligence Medal from the CIA. In his obituary in the Washington Post, we learn, "In the 1950's and early 1960's, the agency gave mind-altering drugs to hundreds of unsuspecting Americans in an effort to explore the possibilities of controlling Human consciousness. Many of the human guinea pigs were mental patients, prisoners, drug addicts and prostitutes - 'people who could not fight back, as one agency officer put it. In one case, a mental patient in Kentucky was dosed with LSD continuously for 174 days.

"Other experiments involved agency employees, military officers and college students, who had varying degrees of knowledge about the tests. In all, the agency conducted 149 separate mind-control experiments, and as many as 25 involved unwitting subjects. First-hand testimony, fragmentary Government documents and court records show that at least one participant died, others went mad, and still others suffered psychological damage after participating in the project, known as MK Ultra. The experiments were useless, Gottlieb concluded in 1972, shortly before he retired.

"The C.I.A. awarded Gottlieb the Distinguished Intelligence Medal and deliberately destroyed most of the MK Ultra records in 1973...

THE APOCALYPSE UNFOLDS

"But with his experiments on unwitting subjects, he clearly violated the Nuremberg standards [clinical trials standards] - the standards under which, after World War II, we executed Nazi doctors for crimes against humanity." (As quoted in *FIGHT FOR YOUR HEALTH* by Byron J. Richards, p 102).

Remember the drug-filled LSD psychedelic sixties? This is where many of the drugs came from. But this is only the tip of the iceberg. Board-certified clinical nutritionist, Byron Richards gives us some insight. "LSD was first synthesized in 1938 by a chemist working for Sandoz Laboratories in Switzerland. His name was Dr. Albert Hoffmann. At the time, Sandoz was part of the IG Farben Nazi drug cartel. Because of LSD's structural relationship to a chemical that is present in the brain, and its similarity in effect to certain aspects of psychosis, LSD was used as a research tool in studies of mental illness, a favorite Nazi research topic.

"The FDA approved the use of LSD as an investigational new drug, meaning it could legally be prescribed in the United States. After World War II the supply of LSD to the CIA from Sandoz was inconsistent. The CIA turned to Eli Lilly, and in the name of national security, Eli Lilly became the CIA's LSD source.

market in the U.S. took hold. OF course, market demand had been fueled by Gottlieb and the CIA. The destruction of many American lives and minds through the use of LSD was partly due to our own government, acting with the help of Eli Lilly." (Ibid, pp 105-106).

Richards goes on to say about this drug company-narcotics relationship,

"In the early 1900s, Bayer discovered how to synthesize heroin from the opium poppy. At first, it was marketed as a remedy for morphine addiction and as a cough suppressant for children. Then the technology became linked to the opium trade, enabling the illicit production of heroin.

"Bayer also invented methadone, which is synthetic morphine. This was to be used as a painkiller in World War II. Eli Lilly and Dupont are American manufacturers of methadone. Today, methadone is used as a treatment for heroin addiction. Drug companies profit from both sides of the problem.

"Many of the chemicals used to make cocaine, such as ammonium chloride, acetic anhydride, acetone, hydrochloric acid, and ether are also used to transform opium into morphine and heroin. These chemicals are made by Eli Lilly, Dupont, and others." (Ibid, p 106).

Many of the drugs used today on our unsuspecting population were developed and/or funded by companies like I.G. Farben, Eli Lilly, Du Pont, and Bayer. Such modern drugs are increasingly being used as treatment for mind related illnesses that in effect, do not cure the problem but manipulate the mind instead.

THE APOCALYPSE UNFOLDS

However, there is another aspect of mind control. This is through propaganda cleverly designed to induce and convince you, the consumer, that these drugs are for your benefit. The media plays a large role in deceiving the public in this regard. Television ads routinely use such words as "greatest," "world's best," "clinically proven," etc. There is no substantiated evidence of these misleading claims.

Virtually every ad seen on TV has actors posing as doctors, nurses, or medical specialists, even judges, policemen, etc. saying how great a product is, either drugs or food, but the actor is merely reading from a script. They are actors employed to deceive you, the consumer. As Kevin Trudeau, author of *NATURAL CURES THEY DON'T WANT YOU TO KNOW ABOUT* says about such ads, "It is important to note that when these ads are developed the companies specifically want to create a 'net impression' that you, the consumer, will receive from the ad. These 'net impressions' are always untrue. This means that a company selling a certain product wants you, the consumer, to believe something that is categorically untrue. This is how ads are created." (p 256. Emphasis, author's).

For example, certain products have been advertised to give the impression you gain better health benefits, strengthen the heart, the bones, or help lose weight. This is done using very sophisticated techniques to produce the desired image in the consumer's mind. Auto-suggestion, fear-tactics and deception are employed. This is exactly how ads are produced to mislead the consuming public. They could be sued for false advertising but they have "friends in high places."

Kevin Trudeau adds, "In movies and on TV shows companies routinely pay millions of dollars to have their products prominently displayed or used by the characters in the movies and television programs. Scripts are actually written around products to encourage you to buy them. This is done without disclosure, and to covertly brainwash you into purchasing products." (Ibid, p 257).

The corporate poisoning of America continues in many ways:

PCB's: PCB's are a mixture of organic chemicals called polychlorinated biphenyls. Once produced they form oily liquids or waxy solids. They are used in industrial applications in making electrical insulation; used as a plasticizer in paints, plastics, rubber products, and in the production of carbonless copy paper. Companies like Westinghouse and General Electric have dumped waste products from making PCB's into the environment. These PCB's waste products degrade very slowly in the environment and often become more toxic as they break-down and interact with other forms of pollution.

Byron Richards reveals that "Monsanto directly or through licensure manufactured 1.5 billion pounds of PCBs until production was banned in the United States. Even after it was banned in the U.S.A., international license holders, such as the infamous Bayer, continued to pro-

duce PCBs for another twenty years.

"Bayer produced PCBs under the trade name Clophen. In 1972, as problems of PCB poisoning became public knowledge, Bayer restricted their supply of PCBs for use in closed systems (transformers, condensers, hydraulic fluid - these systems are still a huge pollution problem). Prior to 1972, Bayer had produced approximately 23,000 tons of PCBs for use in open systems, which directly entered the general environment and the food chain. Bayer continuously increased its production of PCBs until 1980, exporting them for use around the world - knowing full well they were highly toxic to human health and had already been banned in America." (FIGHT FOR YOUR HEALTH by Byron J. Richards, p 118).

He explains further that widespread pollution remains today adding that, "Recent EPA testing of human fat samples shows that eighty-three percent of Americans have PCBs in their fat, indicating current ongoing exposure to these chemicals at a toxic level.

"As a fat-soluble substance, PCBs readily cross any living cell membrane and have a high affinity for accumulating in body fat. They accumulate in humans.

"Like any oil substance, PCBs are prone to oxidation. Oxidation is the process that makes steel rust and is the reason you must keep many food products in the refrigerator to prevent rancidity. When a PCB oxidizes it forms new compounds that are more toxic. Adding one oxygen molecule to a PCB forms a furan. Adding two oxygen molecules forms a dioxin, which is one of the most powerful toxins known to mankind (Agent Orange is an example). Furans and dioxins are found in ninety percent of human fat samples.

"Monsanto executives were aware of these oxidation problems, and their PCBs were frequently shipped already contaminated from their own production process. Furthermore, the PCB oil used in equipment eventually degrades into an oxidized form and, just like a car, this equipment needs an oil change. The result is the dumping of contaminated PCB oil into the environment. Monsanto was so aware of this problem that they made certain to use only purified PCBs in animal experiments when attempting to prove safety.. (Ibid, pp 118-119).

Notice the deception involved in presenting results of experiments to the public. More revealing documents concerning PCBs are marked "Confidential: Read and destroy..."

As regards to the effects on the human body, Mr. Richards states, "Low-grade symptoms of PCB exposure are loss of energy, sex drive, and/ or appetite. Higher toxicity exposure results in skin problems, acne, and liver damage. Ongoing exposure increases cancer risk and causes cancer." (Ibid).

* **The Fluoride Fraud.** We have covered the evils of this cumulative toxin in our previous work, MARIAN APPARITIONS AND

THE APOCALYPSE UNFOLDS

APOCALYPTIC RESEARCH. We give further basic information here along with updated research. Concerning the basic element fluoride, Byron Richard states, ..Fluoride is a mineral that occurs naturally in the environment. The fluoride content of water varies around the world, based on the type of rock and sediment in any given area. Areas high in phosphorous-containing rocks have higher fluoride content in their water. The higher the fluoride content of water, the greater the likelihood of cancer, malformed babies, mental retardation, bone disease, and severe dental problems in those who drink it. High levels of naturally occurring fluoride in the environment are a known toxin of extreme danger to health." (Ibid, p 133).

People living near coal-fired power plants, Aluminum smelters, phosphate fertilizer plants, glass-brick and tile works, and plastic factories are at great risk for excessive exposure.

In addition, "Various food and beverage preparation methods that use fluoridated water may increase the fluoride content in the final food product. Tea contains the highest levels of fluoride of any commonly consumed beverage, because tea leaves naturally attract fluoride. Common products that are subjected to increased fluoride during processing are soda pop, baby food, coffee (especially decaffeinated), canned fish, processed grains, and junk food (another strike against French fries). Even healthy foods, like vegetables, tend to absorb the fluoride when cooked in fluoridated water." (Ibid, 138).

Because of the dangers of fluoride becoming more evident, communities in this country and even whole nations (the United Kingdom, for example) have reversed their stance on fluoride and are no longer using it. In others, private citizens have asked their communities to stop using it. One such citizen is Bev Cousineau.

In a letter to the editor of *The Messenger*, she wrote, "I developed very bad hypothyroid symptoms in 2004 after being successfully treated for acute asthma. This year while researching fluoride, I found it was in the medications I was taking and in all likelihood caused fluoride saturation. How many people take fluoridated medications in conjunction with water fluoridation and don't know why they are not doing well?"

"In October I requested the City of Elroy to stop this practice and I am still waiting for a response. I believe the public needs to be informed about this insidious toxin. Clinical practice is notoriously 15-20 years behind the current science so it is no wonder that people don't hear this from their doctors and their dentists are still espousing the benefits."

In her Guest Column article, Bev Cousineau writes in her opening paragraph, "Given the current information from official sources on the dangers of fluoride, it is time to rethink the decision regarding mass medication of diverse populations via water fluoridation."

She goes on for two long newspaper columns explaining fluoride,

THE APOCALYPSE UNFOLDS

what it is and what it does. Under the heading of "What **It** Does," she states "The most obvious disease linked to chronic fluoride poisoning is hypo-thyroidism. Because of its' affect on the pituitary, blood levels may not appear abnormal. Some of the symptoms include obesity, early puberty, lethargy, chronic fatigue, depression and heart disease."

She notes among other things the non-water sources: "Airborne fluorides are due to pesticides, phosphate fertilizers, vehicle emissions and industrial wastes to name a few. Thousands of tons of fluoride are emitted by industries each year alone.

"Hydrogen fluoride can exist as a particle and as such become part of clouds, fog, rain, dew or snow. **It** easily mixes in waterways."

Bev Cousineau goes on to enumerate other non-water fluoride sources:

"Many people take medications [eg. Paxil, Prozac, Cipro, Diflucan, Advair, Lipitor, Celebrex] containing fluorine compounds which greatly add to fluoride's anti-thyroid effects. Many surgical anesthetics also contain fluoride. These compounds assist the medication to cross the blood-brain barrier so less of the drug is required.

"Household exposures can occur with the use of Teflon pans, insecticide sprays and even residual airborne particles from drinking water."

She furthermore discloses, "On June 29, 2000, J.Wm. Hirzy testified at the U.S. Senate Congressional Hearing on Arsenic, Radon, and Fluoride on behalf of the union representing the toxicologists, biologists, chemists, physicians, statisticians, epidemiologists, attorneys, scientists and other professionals at the U.S. EPA [Environmental Protection Agency], Washington D.C. He said they are calling for a moratorium on all fluoridation. He cited scientific evidence that the union of scientists have in their possession and court findings in three different states concluding that fluoride in public water supplies causes cancer, or contributes to the cause of cancer, genetic damage, intolerant reactions, chronic toxicity, dental fluorosis, bone pathology and neurological injury in humans and that fluoride in public water supplies aggravates malnutrition, iodine deficiency and other existing illness.

"A recent statement [August 2007] of over 600 professionals are requesting Congress to stop water fluoridation until Congressional hearings are held. Among the signers are Dr. Arvid Carlsson, winner of the 2000 Nobel Prize for medicine, two officers of the Union representing professionals at EPA, the President of the International Society of Doctors for the Environment and hundreds of medical, dental, academic, scientific and environmental professionals around the globe."

For those wanting to avoid exposure to fluoride, she recommends checking your municipal supply and if fluoridated, ask to have it removed in writing. She also recommends avoiding using fluoridated products etc. among other things.

As to why our government is still fluoridating the water supply, Bev

THE APOCALYPSE UNFOLDS

Cousineau states, "It is widely known that industries just like pharmaceutical companies spend a great deal of money to lobby Congress to protect their interests. Follow in the news the push to loosen controls on industrial emissions. It is very profitable to industry to sell municipalities their hazardous waste." (THE MESSENGER OF JUNEAU COUNTY, Vol. 9, No. 23, Dec. 27, 2007. "Fluoride Dangers" by Bev Cousineau, p 26) .

Byron Richards points out, it goes much deeper than this.

"An experiment is being conducted on the population of America - a national clinical trial. Exposure of humans to untested chemicals at levels that clearly interact with health is extremely reckless and highly unethical, violating the Nuremberg Code. The fact that public-health officials are allowed to do this is actually a crime against the citizens of our country. It is a serious betrayal of public trust and public health in the name of profit and control. 'Scientists for hire' are in full play here, giving false credibility to government-sponsored fluoride propaganda.

"Good scientists at the EPA have tried to lower the acceptable fluoride level over the years. They have been consistently quieted by their administrative superiors, who have a cozy relationship with multiple players in the fluoride industry. As we have seen with perchlorate and the EPA, the Bush Administration has nullified public safety in the name of protecting corporate interests. The FDA does nothing in the form of labeling to protect Americans. The industry itself spends considerable energy and money trying to discredit and ruin any scientist or individual who dares to speak out against fluoride." (Ibid, p 142).

He goes on to say: "The fluoride debacle is an example of what is wrong when government and industry are too intertwined. Are fluoride in the drinking water and pesticides making Americans too passive to do anything about their daily dose of nerve, thyroid, and bone poison? Are they making Americans too passive to stand up for their freedoms? Don't think a government bent on controlling public opinion and behavior doesn't understand these issues. Don't think the sickness industry cares that fluoride and other environmental poisons will one day produce new customers. It is no small wonder that many of the drug companies have some hand in fluoride production. The fluoride fraud is one of the most health-destructive initiatives ever perpetrated on a free people. It is time to quit protecting industry at the expense of human health." (FIGHT FOR YOUR HEALTH by Byron J. Richards, pp 142-143).

*** The Statin Scam.** The Cholesterol scare is the biggest health hoax of the modern era. Selling poison to healthy people takes considerable smooth talking and deception on the part of the FDA (Federal Drug Administration), Big Pharma and the Big Food industries. Lowering cholesterol with statin drugs has nothing to do with optimal health.

Another part of the deception is linking heart disease to high

THE APOCALYPSE UNFOLDS

cholesterol levels. This takes even greater deception using drug company funded studies to alter statistics in favor of drug use instead of using common sense proven remedies such as herbal treatments, a change in life-style (and eating habits) as well as a good diet and exercise.

Many people do not understand the function of cholesterol in the body. Cholesterol is essential to cell building like building blocks are to a house. In addition cholesterol is essential in carrying nutrients to the cells. There are several other body functions that cholesterol is produced for. These include:

1. The formation of HDL cholesterol (a smaller form) and LDL cholesterol (a larger form), both very beneficial to the body.
2. Carrying cholesterol (the LDL "building blocks") to cells.
3. The production of bile acids to aid digestion of fat and clearance of toxins (more than 25% of the American population are obese).
4. The production of vitamin D for immunity and calcium metabolism.
5. The production of all adrenal hormones that govern the ability to handle stress.
6. The production of sex hormones.

The use of statin drugs to lower cholesterol inhibits, alters and weakens the above named functions. Consequently you have people with lowered enzyme function, less energy, obese, unable to handle stress, depression disorders and/or with a lowered or non-existent sex-drive. The fact of the matter is statins are anti-energy and therefore anti-life.

So would you like to live a long active energetic life relatively free of disease? Don't use statins. In fact don't use drugs (unless under emergency conditions in a case where there is no other choice). They are POISON! A study in people over 85 showed that heart disease was the number one killer. However those people found to have higher cholesterol levels lived longer because mortality from cancer and infection was less frequent.

Relative to the last point on infections and disease in general, statin drugs suppress the immune system. Regardless of all the above the sales of statins in 2005 totaled \$22.6 billion. To put it in comparative perspective, this one drug had more sales than all of professional sports. The main statin drugs are: (1) Lipitor, the world's top-selling drug - \$12.2 billion (Pfizer);

(2) Zocor, \$4.4 billion (Merck); (3) Vytorin, \$2.4 billion (a Zocor-Zetia combination from Merck & Schering-Plough); (4) Pravachol, \$2.3

billion (Bristol-Myers Squibb); (5) Crestor, \$1.3 billion (Astra-Zeneca). Generic brands have now also entered the market.

Byron Richards states about statin statistics and sales: "Today, statins are protected by a carefully concocted shield of statistical mumbo-jumbo. Statin study statistics are easily manipulated and can obscure true risks. Many of the studies that support statin use are contrived and misleading in order to forward drug-company sales." (FIGHTFORYOURHEALTHbyByronRichards,p173).

* **Bone Bunk.** The next con to expose is the bone drugs being sold to the unsuspecting, supposedly to prevent bone loss. It is another drug being sold by the con-artists, in this case, drug companies, to us suckers (oops, I mean consumers). In other words, it is another poison being sold to healthy people, or relatively healthy people, to make them sick. It is aimed at mainly the aging baby-boomer generation.

Drug companies claim that their bone drugs build bone density. But the truth is, just as fluoride gives the appearance of better teeth, bone drugs give the appearance of bone density due to chaotically grown swollen bone that is clearly inferior with mineral content lessened and hardness diminished.

So what fluoride along with bone drugs cause is an unhealthy malformed bone. Bone drugs also interfere with the balance between the osteoclast activity and the osteoblast activity. We all know old cells die and need to be replaced with new cells. That is the job of the osteoblast cells, the builders of new bone tissue, and the osteoclast cells, the repair cells that remove old stressed bone tissue so that new bone can be built.

In osteoporosis and bone loss, the osteoclast activity is far greater than the osteoblast activity, the ability of osteoblast cells to build new bone. Bone drugs claim to correct this by killing the repair cells, the osteoclast cells. What the drug really does is to disrupt energy production in the bone by interfering with the gene signals that relate to energy production. Once the osteoclast runs out of energy it dies.

The bone drug then gravitates to the bone and layers itself in becoming part of it, causing malformed unhealthy weak bone. There is no enzyme in the body to take them apart so they are there permanently. Osteoclasts are a part of normal healthy bone function. Drugs are not.

The imbalance between osteoblast activity and osteoclast activity, which causes bone loss is due to the inflammatory signal at the genetic level of cell function causing excess osteoclast production. To put it simply, this problem of faulty function in bone cells is caused by lack of proper nutrition which in turn is caused by mineral deficient foods, poisons and toxins in our food, water and environment as well as physical and emotional stress.

Nutrients are needed along with pure water, fat, carbohydrates, protein, and minerals that through enzymes, act to regulate the structure and function of the body. Bones require essential nutrients for healthy body functions. Nutrients such as calcium, protein, vitamin D, Vitamin K, boron, silica, strontium, and manganese, etc. are vital to constructing bone tissue.

So throw away your Fosamax (Merck) or Actonel (Procter & Gamble) in the trash and turn to natural health remedies that have been proven to work, instead.

*** Vaccinations and Planned Plagues.** Approximately five years ago (2003) DIAMOND STAR RESEARCH did a study on the role of vaccinations, influenza mycoplasmas, and antibiotics in planned plagues to bring about a reduction in the world's population. We present that information here.

"The New World Order Advocates don't always use some catastrophic event (such as the tragic Trade Center and Pentagon attacks) to reduce the world's population. They use famine, abortion, and euthanasia as well as even more subtle means: pestilence and disease. Illnesses and sicknesses are created to gradually kill off the weaker, the older or infirmed, and the disabled, etc. This is done in such a way as to make it appear as a result of poor conditions in environment, living standards, diet, etc. After all, people get sick all the time- colds, influenzas and so forth. What you are not being told is that all this has been planned this way years ago to create a sick society through the use of pesticides, preservatives, and pathogenic disease agents. Conditions were planned and created. It has not been an accident.

"First the pesticides were promoted and used on crops which polluted our environment. Simultaneously, food was processed in such a way as to severely reduce its nutritional value or in some cases make it almost worthless." (APOCALYPSE BEACON, Winter, 2003. "Population Control Via Planned Plagues," p 5)

The article goes on to detail pesticides, genetically altered foods, mycoplasmas, and antibiotics, etc. We have quoted this introductory part to illustrate the fact that the population has been weakened by these factors and set-up for further sickness and euthanizing in the plan of New World Order genocide.

From the same article, we quote the section on vaccinations.

"Shots or so-called 'immunizations' are what conspiracy researcher, Eustace Mullins calls 'murder by injection.' Vaccinations do not immunize but inject poisons into the body raising the level of toxicity. There is considerable evidence vaccinations cause disease - they do not prevent it. Consider these statements:

THE APOCALYPSE UNFOLDS

"Several of my personal friends now have cancer, some of them have died from it. I have inquired into the probable cause of the serious increase of this horrible disease. I believe as do many of other physicians that cancer is due to impregnating the blood with impure matter and it is obvious that the largest method by which this is done is vaccinations and revaccinations.' (J.S.Preston, M.D.).

"I am thoroughly convinced that the recent great increase in cancer is directly due to vaccination. I have written my report to several members of Parliament and invited them to the hospital to witness the dismal results of the Vaccination Act for themselves.' (William Forbes, M.D., Medical Director, St. Saviour's Cancer Hospital, Regents Park, London, England).

"The increase in cancer has jumped four times higher in just the short time since vaccinations have been made compulsory. This terrible increase is one of the most unsatisfactory features of the Vaccination Act.' (M. Hibbert, M.D., Secretary of the Government Medical Board).

"Vaccinations are how cancer is spread.' (The London Hospital Gazette).

"All of the above statements were reported and entered into the Medical Record, Volume 31, published in New York, January 11, 1887! Note the date! Dr.Schultz notes, 'Since then the incidence of cancer has increased OVER 30 TIMES!'" (GET WELL NEWSLETTER, Nov., 2002. Emphasis in the original).

"Here in America from July 1990 to November 1993, the FDA counted 54,072 adverse reactions following vaccinations. The FDA reported that 90% of doctors do not report vaccine reactions. There are still more startling facts:

"* In 1977, Dr. Jonas Salk (inventor of the Salk polio vaccine) testified along with other scientists that most (87%) of the polio cases which have occurred in the U.S. since the early 1970's probably are the by-product of the polio vaccine itself.

"* In the U.S.A., the cost of a single DPT shot had risen from 11 cents in 1982 to \$15 in 1992. The vaccine company is putting away \$12 per shot to cover legal costs and damages paid to parents of the brain-damaged children who die after vaccination.

"• Children die at a rate of eight times greater than average within 3 days of getting a DPT shot.

"* There was never, EVER a case of autism in children before childhood vaccinations were used.

"(Above information supplied by Dr. Richard Schultz).

"Obvious conclusion: Don't take vaccinations!" (APOCALYPSE BEACON, Winter, 2003, pp 7-8).

In regards to Autism, there is growing evidence that vaccine causes the condition to develop. "Though underreported in the mind control media, credible science presented by plaintiffs in Cedillo v. The Department of Health and Human Services (June 11-15, 2007) is establishing the link between government recommended childhood vaccines and the nation's autism epidemic. Cedillo is the first of nine autism test cases to be heard in the vaccine court's Omnibus Autism Proceeding. These nine cases are bringing together more than 4,800 claims alleging that vaccines and their components caused neurodevelopmental disorders, including autism in children. The Cedillo case was heard in the United States Court of Federal Claims before three administrative judges." (THE IDAHO OBSERVER, Vol. 10, No. 5, June 19, 2007. "Vaccine/Autism Connection Case Goes to Court," p 1).

Following up on this case, the Idaho Observer reported on the vaccine/autism link with Dr. Sherry Tenpenny of New Medical Awareness, stating, "Michelle (Cedillo) developed normally during the first year of her life. Seven days after her MMR vaccine (measles, mumps, and rubella) at 15 months, she abruptly developed a high fever that abated and then recurred. Shortly thereafter, she lost her ability to speak, became disinterested in her surroundings, developed intense sensitivity to sounds and was eventually diagnosed with autism.

"Additionally, two weeks after the shot, she developed severe diarrhea which persists to the present day. Prior to receiving the MMR, she received vaccines containing more than 100 micrograms of mercury from thimerosal.

"Facts supporting the connection between her autism and the MMR include a biopsy of her intestinal lining documenting vaccine-strain measles virus when she had no other measles exposure. Reporters from the major networks, newspapers and publications are repeating dismissive, boiler plate remarks as told them by pharmaceutical companies and pro-vaccine medical community 'experts.'

"The result is a spin on an issue that is a combination of complex neuroscience, mercury toxicity and biological causation. Without balanced reporting, parents will be made to look like money-hungry gold diggers." (THE IDAHO OBSERVER, Vol. 10, No.6, July 23, 2007. "Cedillo and Its Potential Impact on Vaccine Awareness and Vaccine Injury Compensation" by Dr. Sherri Tenpenny, DO, p 7).

The culprit in the vaccine/autism connection is thimerosal which contains mercury, a very toxic poison. Relative to this Z Magazine Online in an article, "Eli Lilly, Zyprexa and The Bush Family: The Disease of Our Malaise," May, 2004 reported, "In 2002, Eli Lilly flexed its muscles at the highest level of the U.S. government in an audacious

THE APOCALYPSE UNFOLDS

praised by President George W. Bush as a 'heroic action that demonstrated 'the resolve of this great nation to defend our freedom, our security and our way of life. Soon after the Act was signed, New York Times columnist Bob Herbert discovered what had been slipped into the Act at the last minute and on November 25, 2002, he wrote, 'Buried in this massive bill, snuck into it in the dark of night by persons unknown ... was a provision that - incredibly - will protect Eli Lilly and a few other big pharmaceutical outfits from lawsuits by parents who believe their children were harmed by thimerosal.'

"Thimerosal is a preservative that contains mercury and is used by Eli Lilly and others in vaccines. In 1999 the American Academy of Pediatrics and the Public Health Service urged vaccine makers to stop using mercury-based preservatives. In 2001 the Institute of Medicine concluded that the link between autism and thimerosal was 'biologically plausible! By 2002, thimerosal lawsuits against Eli Lilly were progressing through the courts. The punch line of this Lillygate is that, in June 2002, President George W. Bush had appointed Eli Lilly's CEO, Sidney Taurel, to a seat on his Homeland Security Advisory Council. Ultimately, even some Republican senators became embarrassed by this Lillygate and, by early 2003, moderate Republicans and Democrats agreed to repeal this particular provision of the Homeland Security Act." (As quoted in FIGHT FOR YOUR HEALTH by Byron J. Richards, pp 106-107}.

Byron Richards states in regards to this report, "Today the thimerosal issue is a hotly debated topic. It leaves the entire immunization industry hanging by a thread, as they clutch to the ever-evaporating evidence that thimerosal is harmless." (Ibid). Of course since 2006, as noted above, it has been proven that there is a definite link between thimerosal and autism.

Flu shots are another big danger which we have already reported on. However, flu shots are not simply marketed to the elderly and those with weakened immune systems anymore. Now it is being promoted very strongly for everyone to "get their flu shots." For example, Greg Ciola, editor of The Crusador reports, "It wasn't until I went to my local grocery store that I realized how low pharmaceutical companies would stoop to propagandize the public with lies. While I was at the checkout counter a young woman bagging my groceries looked at me, smiled, and said, "Have you had the flu shot yet?" I was stunned.

"I looked at her and said: 'There is no way that I would put that poison into my body.'

"With curiosity about why someone would make such a bold statement, we engaged in conversation and I spent the next ten minutes giving her an earful. I asked her if she had any information from the store about the shot and she went over to the front desk to get a flyer outlining the reasons for getting the shot along with the store locations and times I

could get it.

"In big bold letters across the top of the flyer were the words: 'TAKE YOUR SHOT!' In addition to the flu shot, they were also promoting pneumonia shots and tetanus/diphtheria shots. It was then and there that I realized I had to speak out against this insanity." THE CRUSADOR, Nov./Dec., 2007. "EmergencyAlert", p 7}.,

The fact of the matter is such vaccines contain a number of toxins: fluids of chicken embryos injected with a strain of influenza virus that government health officials think will be prevalent during the coming flu seasons. In addition to this the vaccine contains aluminum, formaldehyde, infectious microorganisms (as noted above), thimerosal (mercury), ethylene glycol and other toxic adjuvants as well as aborted fetalceUs.

How is the human body supposed to build immunity from this toxic cesspool? Little known is how dangerous some of these toxins are. Mercury contained in the thimerosal is so toxic it is rated as being the second most toxic substance in the world- radioactive plutonium being the most toxic.

It would prove interesting to know how thimerosal is made. Greg Ciola reports, "To make thimerosal, they start with elemental mercury. Then, they hop it up 1,000 times by converting it to ethyl mercury. Then, they add aluminum to the vaccine that has a synergistic effect with the mercury, causing it to be 10,000 (times) more toxic than elemental mercury. Mercury is used to sterilize the flu vaccine.

"Consider this insanity: they tell us that it's unsafe to touch, breathe or swallow the mercury from a broken thermometer yet it's perfectly acceptable to inject the same poison directly into your body through the flu shot or other vaccines. In fact, you can't even find mercury based thermometers on the market anymore." (Ibid).

Regarding formaldehyde, Mr. Ciola states, "Formaldehyde is classified as a toxic, colorless, water-soluble gas having a suffocating odor. It's used predominantly in embalming fluid and vaccines as a disinfectant and preservative. There are no long-term safety studies that vaccine manufacturers can draw from to validate the effectiveness of the flu shot. Those that take the shot are the safety studies and only 10% of the side effects associated with vaccines are ever reported to federal agencies. In fact, a simple search on the internet will lead you to literally thousands of websites and stories that report on vaccine injuries, including the flu shot. What you find will not put you at ease if you've bought into this myth. If the public were fully informed of all the ingredients in the shot and the potential side effects, there would be a mass exodus away from it." (Ibid).

Furthermore, evidence indicates that those who receive the flu shot have a weakened manipulated immune system that could be contagious for weeks and spread germs to the general public. The flu shot actually

THE APOCALYPSE UNFOLDS

weakens the immune system in the long run, and it is being linked to Alzheimer's disease in those who have taken it repeatedly.

Another deception being perpetrated by the vaccine cartel/health hoax industry is that the flu shots contain inactive or dead virus. If that were the case the shot would never stimulate an immune response. What the flu shot actually contains is an "attenuated" virus. Highly recognized authority on the dangers of vaccines, Tim O'Shea, author of The Sanctity of Human Blood: Vaccination Is Not Immunization," tells what "attenuated" actually means.

"Attenuated means half-killed. The infectious agent is weakened so that it is just below the threshold of being able to trigger an inflammatory response in 99% of people. By allowing the implantation of an attenuated virus or bacteria into the body, we have done something nature would never permit. We have violated the sanctity of the bloodstream. We have tricked the immune system into not mounting an all-out response to a foreign agent. If the vaccine's microorganisms were not attenuated, the powers of the natural immune system would join together to repel and attack the invader."

Tim O'Shea goes on to say about flu shots, "A vaccine supposedly contains some version of the causative agent, in a weakened form. With influenza, by the time the virus that is causing the current incidence of influenza has usually changed to a form completely unaffected by the vaccine. Michael Decker, MD of Aventis, the flu vaccine manufacturer admits: 'By the time you know what's the right strain, you can't do anything about it.'

"This doesn't even take into account the unique form influenza virus takes within each person. Yet with flu shots, it's One Size Fits All - everyone gets the same vaccine. If it really worked, you wouldn't have to come back next year. Natural immunity is for life.

"Ever notice that people who get flu shots all the time keep getting the flu? Think that could have anything to do with not giving the body a chance to put immunity together itself?" (Tim O'Shea as quoted in THE CRUSADOR, Nov./Dec., 2007. "Emergency Alert," pp 7-8).

Furthermore, vaccines bypass the natural defense capabilities of the liver, kidneys, colon and lymphatic system and of course the immune system, being injected directly into the bloodstream. After receiving the flu shot people can go into shock. Some have died and others have been seriously injured after receiving the flu shot. Guillain-Barre, temporary Multiple Sclerosis-like illness, breathing problems, hoarseness, wheezing, hives, paleness, dizziness, weakness, and rapid heartbeat are all reported side-effects of taking a flu shot.

It used to be the Christian community believed in not putting anything into their bodies that knowingly would hurt them. Apparently not anymore. Instead we are being caught up in the fear and panic of Big Pharma. We need to trust in God and His Natural Laws. That is where

our safeguards are.

If you're still convinced flu shots prevent flu consider the following:

"In 2003, a Canadian nursing home sent out a memo that stated all employees had to take the flu shot. Those that refused would be put on a leave of absence and possibly face the loss of their job. Not believing the hype, one employee (a personal friend of this writer) stood on her principles and refused the shot while her entire staff went along with the order. Much to her amazement, everyone that took the shot came down with a bad case of the flu except for her. There are reports like this all over North America but there's a virtual media blackout on this truth because there's an agenda behind the promotion of the flu shot." (THE CRUSADOR, Nov./Dec.,2007. "EmergencyAlert" by Greg Ciola, p 7).

Indeed, there is an agenda. That agenda involves police state Gestapo tactics. For those who think it "can't happen in America," are in for a surprise. It already has, as reported by Mike Adams of NewsTarget.

"Following the State of Maryland's threats against parents who refuse to have their children vaccinated, children were herded into a Prince George County courthouse being guarded by armed personnel with attack dogs. Inside, the children were forcibly vaccinated, many against their will, under orders from the State Attorney General, various State Judges and the local School Board Director, all of whom illegally conspired to threaten parents with imprisonment if they did not submit their children to vaccinations.

"The State of Maryland has now turned to Gestapo tactics to force its medical will upon the people, stripping parents of any right to decide how they wish to protect their own children from infectious disease. Health authorities there have already announced their intent to essentially kidnap parents and throw them in jail, removing them from their children for up to thirty days if they continue to refuse to have their children vaccinated. This will all be conducted at gunpoint, with armed personnel and attack dogs at the ready, making sure nobody steps out of line, and suppressing any attempt at public dissent against the Orwellian vaccination policies."

Even the American Association of Physicians and Surgeons (AAPS) announced its strong opposition to police state tactic in vaccinating children. About this "gunpoint medicine," the Association in its press release of November 16, 2007, stated, "The Association of American Physicians and Surgeons today condemned the 'vaccine roundup' executed in Prince George County, Maryland this week, and promised to support parents who refuse to immunize their children.

"This power play obliterates informed consent and parental rights," said Kathryn Serkes, director of policy for the Association of American Physicians and Surgeons (AAPS), one of the few national physician groups that refuse corporate funding from pharmaceutical companies.

"In a scenario reminiscent of cattle round-ups, the state's attorney

THE APOCALYPSE UNFOLDS

has issued summons to more than 1600 parents of children who have not provided certificates of immunization for their children. But instead of toting a cattle prod, this state's attorney chooses to wield a syringe to keep the 'herd' in line." (As quoted in THE AMERICANS BULLETIN, Jan./Feb., 2008. "Children Herded Like Cattle into Maryland Courthouse Forced Vaccinations, Armed Police and Attack Dogs Stand Guard" by Mike Adams. p 1).

Laws are already being put on the books to force vaccinations on everyone. First the Big Pharma-Medical Monopoly tried to scare Americans into getting vaccines: the Swine Flu scare, Legionnaire's Disease, the West Nile Virus, the Bird Flu, and finally biological attacks from terrorists. But as more people wake up to the truth, Big Pharma and Big Brother team up to use deadly force to give us deadly "shots" or what Eustace Mullins calls "murder by injection."

In our Winter, 2003 APOCALYPSE BEACON were reported,

"President Bush has approved the Smallpox Vaccination Plan. The Bush Administration announced on December 16, 2002 that it plans to begin vaccinating Americans against smallpox in advance of a possible biological terrorist attack. To make sure this is carried out, the Model States Emergency Health Act has been passed in 20 states. MEPHA can be invoked any time there is a public health emergency such as the aforementioned biological terrorist attack. The 500,000 military personnel stationed overseas are most likely to get the vaccine as they have no say in the matter. For the 450,000 to 500,000 healthcare workers, it is voluntary but many are refusing to take it. Joe Taglieri of From The Wilderness staff reports about MEPHA: 'Georgetown and John Hopkins' Center For Law and Public Health, the think tank where this state legislation model was created, reports MEPHA-like laws have been passed in 20 states, and 16 state legislatures have introduced measures dealing with public health emergencies caused by a terrorist attack.

'States where MEPHA laws have been enacted include: Arizona, Delaware, Florida, Georgia, Hawaii, Maine, Maryland, Minnesota, Missouri, New Hampshire, New Mexico, North Carolina, Oklahoma, South Carolina, South Dakota, Tennessee, Utah, Vermont, Virginia, and Wisconsin. Washington D.C. has also enacted an emergency health powers law.

'State legislatures where MEPHA has been introduced include: California, Connecticut, Idaho, Illinois, Kansas, Kentucky, Massachusetts, Mississippi, Nebraska, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Washington, and Wyoming.' (FROM THE WILDERNESS, Dec. 31, 2002, Vol. V, No. 8. "Bush Approves Smallpox Vaccination Plan" by Joe Taglieri- pp 10 & 15).

"Even though President Bush promised to be vaccinated with U.S. troops, HHS Secretary Tommy Thompson appeared on CNN and stated

THE APOCALYPSE UNFOLDS

that smallpox vaccines are inherently dangerous and that cabinet members (such as himself) would not be receiving the vaccinations. But laws are being enacted to force the American citizen to take these 'inherently dangerous' vaccines. Is there something wrong with this picture?" ("Alert", pp 8-9).

In recent state activity regarding this Model States Emergency Health Act, it is now 24 states that have actually introduced versions of this Act which is now called the Model States Emergency Health Powers Act. Four states: Idaho, Washington, Wisconsin, and Wyoming - have either inactivated or defeated this legislation, according to Sue Blevins, President of the Institute for Health Freedom.

There are several other related Acts being legislated including the Model States Public Health Act and several others, all assaulting our civil liberties in the name of "Homeland Security."

So there you have it, at least the basis of what has been happening regarding the biggest health hoax in history.. There is much much more.
